DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, drawn to the multimode optical fiber, classified in class 385, subclass 123.
 - II. Claims 5-14, drawn to the method of manufacturing the multimode optical fiber, classified in class 65, subclass 402.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions in Group II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the preform is twisted in order to make the multimode optical fiber.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2882

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. A telephone call was made to Peter V.V. Wilde on 22 April 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. It is noted that Mr. Wilde was out of the office when the examiner called regarding the restriction requirement. However, the examiner did not receive a return call from Mr. Wilde regarding the restriction requirement; therefore, the examiner is requesting a written response for the restriction requirement.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
